MODELS 145 AND 325

I.F. = 264 K.C.

Sw. in High Freq. Pos.

September, 1934.

DWG NO. MODEL 145-25 TYPE 15T

In Model 325 the field coil is 1200 Ω and the voltages throughout are slightly higher than shown in diagram. In later sets C4 is not used, the diode circuit is changed and there are some minor changes in the frequency-switch circuit.
